

# Southern District Health Board - Otago Constituency

## Electing 4 Board Members

---

### **Shanon ARNOLD**

Independent

My principal place of residence is in the Southern District Health Board - Otago Constituency area.

I am Managing Director of Mobility Solutions Centre Dunedin and Otago Autotrimmers. I work within the disability sector selling and maintaining healthcare equipment, for Enable NZ

and ACC, I have been doing this for 15 Years. I have a background in Sales and Marketing.

I wish to be elected to the DHB, to make our healthcare substantially better than it currently is, (ensuring quality care in all of NZ). I wish to bring customer service back into this industry, an example is including how a more effective first time consultation, can result in cost effectiveness, by having patients not returning for repeat visits and ensuring earlier diagnosis. My family have been affected by the current lack of quality, in the above example and I sincerely believe that with our new hospital, we need a service to reflect this. I can be contacted on 0277271471, shanon@mobilitysolutionscentre.co.nz

#### *Conflict of Interest Statement*

I have the following current conflicts of interest with the Southern District Health Board (SDBH):

(1) I partially own and am the Managing Director for Mobility Engineering Limited (2004974) that has a Repairs and Maintenance Contract with

- Enable New Zealand is governed by the Mid-Central District Health Board

- Accessable - healthcare equipment funded by ACC

(2) I sell Healthcare equipment to the Ministry of Health and Accessable and some DHB's throughout New Zealand

(3) I know many staff that work within the SDHB due to the above conflicts 1 & 2

(4) One of my Businesses Otago Autotrimmers also deals with modifications of vehicle and sometimes does this for the Southern DHB, and its Patients. As well as for ACC.

To the best of my knowledge and belief, I have no other conflicts of interest within the Southern DHB nor do I believe I will have any additional conflicts of interest in the future, other than the continuation of the above to a lesser capacity.
