

What happens to this information?

Vision and hearing information is held on a nationwide data system and may be shared with other child health information programmes and Well Child Tamariki Ora Services including the B4 School Check.

If your child is found to have a hearing/vision loss this information is shared with the Ministry of Education to ensure early intervention services are offered to you and your child.

No published reports identify you or your child in any way.

All staff with access to this documentation adhere to the Health Information Privacy Code.

The results will be given to you via the Early Childhood Education Centre, Kohanga Reo, and/or school for your collection.

Ensuring children can hear and see well is critical to their ongoing development.

Qualified Vision Hearing Technicians provide a free service as part of the national Before School Check screening programme.

This has two parts:

1. Vision Hearing Screen at your child's school or pre-school.
2. The B4 School Nurse visit to complete the Well Child portion of the 4 year old check.

You can contact your local Vision Hearing Team and B4 School Nurse for an appointment as soon as your child turns four years of age.

How well can your child see and hear?

Vision and Hearing Screening

Why should my child's vision and hearing be screened?

Healthy vision and hearing is essential for your child's learning, growth and development. Your child's vision and hearing continues to develop and may change throughout childhood. It is important to detect any problems early through a vision and hearing screen.

How is vision and hearing screened?

Audiometry (hearing screen)

An audiometer with headphones presents a range of sounds. Hearing levels are determined by the responses given by the child during screening.

Tympanometry (screening for glue ear)

A child is only screened for this if a pass result is not achieved for audiometry. Tympanometry measures the pressure in the child's middle ear. This will identify glue ear, grommets or perforation/wax.

Vision (distance vision screen only)

This determines how well your child is able to see at a distance by using either a letter matching game or reading an eye chart.

When are children screened?

Four years: Vision and hearing (as one part of the B4 School Check)

New entrant: As above if not screened at four years

School Year seven: Distance vision only

Where can your child be screened?

Your child can be screened at their pre-school, school or at a free clinic. Clinics are by appointment, please contact your local Vision Hearing Team to arrange an appointment.

Freephone 0800 885 504

NOTE: Vision and hearing screening tests are not a full diagnostic assessment of your child.

If you have any ongoing concerns regarding your child's ears or eyes, please consult your family doctor, an optometrist or your school Public Health Nurse.
