

Transit Temperature Monitoring Record Pfizer Comirnaty (COVID-19 mRNA vaccine) Vaccination Programme Must not exceed 48 hours transportation time

Note: The 48-hour limit refers to the movement during transportation of the thawed undiluted vaccine (stored at $+2^{\circ}C$ to $+8^{\circ}C$)

Please refer to the NZ Post and MoH transit allocation times for each DHB.

If you are moving stock back to a DHB, please provide record of its transit time, and remaining travel time.

| Date: | Vial quantity: | MoH/NZPost transit time remaining: | Starting location: | Transit locations: | Total moving time: | Transit time remaining: |
