

Community Health Council

Key Messages for July 2022

- Community concern was reported about difficulty accessing primary care in East Otago
- CC received an update re Carpel Tunnel treatment pathways, and the introduction of technology to deliver alternative care for this condition. It is traditionally difficult to access the pathway through secondary care towards surgery – this may be an appropriate alternative for many patients
- The Maternity Quality and Safety Programme has recently re-grouped, with new CHC Advisors representing the community voice. CHC had not received an update from this group for some time
