How to Unpack Credo

1. **Open the box immediately:** Lift the cardboard outer lid, then the lid of the Credo outer, the silver VIP panel and the plastic Credo top plate to retrieve products inside.

2. **Locate the Google Scout logger.** It will be on top of the vaccine packs inside the plastic bag. Do not attempt to push any buttons on the Goggle Scout logger.

3. **Check the Google Scout logger:** No light displayed means the temperatre is within range and red light means there may have been a temperature breach.

If there is a red light displayed, Quarantine the vaccines in the fridge and email vaccinelogistics@health.govt.nz

4. Place the Google Scout logger back into the empty credo and replace plastic Credo top plate, the silver VIP panel and tape the box to seal.

5. Return the empty Credo and the Datalogger to the driver within 5 minutes
